PROFILE SUMMARY

Dynamic Full-Stack Web Developer passionate about building robust, user-centric web applications. Proficient in modern JavaScript frameworks, responsive front-end design, and efficient database management. A proactive problem-solver committed to continuous learning and implementing software engineering best practices.

PROJECTS

WorkConnect

- Designed and implemented responsive, interactive user interfaces using React.js and modern UI frameworks.
- Built robust back-end RESTful APIs using Node.js and Express.js to handle dynamic data flow and secure application routing.
- Integrated database management systems to reliably store, query, and manage user and application data.
- Managed version control, branching, and repository deployment using Git, Git Bash, and GitHub.
